PROFESSIONAL SUMMARY

I coordinated a 6-person support team at thePower and automated our own operation with AI. Since January 2025 I have designed and taken to production two internal tools: an assistant that answers 55% of student conversations (vs. 15% before) and an app that resolves 100% of withdrawal and refund requests within 3 days. Previously, B2B business development and key account management in consulting. I am open to a support operations, CX or AI-driven process automation role.

FEATURED AI & AUTOMATION PROJECTS

PowerCom — AI-powered student-support assistant

thePower · In production since December 2025 · Grok API · PostgreSQL (Data Warehouse)

55%
of conversations answered by AI (vs. 15% before)

85%
of those resolved by the AI

~2,000
tickets per month

20+
Intercom licenses no longer needed, plus the annual contract (from 2027)

- Built to replace Intercom. Personalizes answers based on each student's program and escalates to a person for out-of-scope queries or signs of frustration.
- Used by 25 people across the support team and managers, with no per-user cost. Intercom remains as a backup until its contract ends (December 2026) while users migrate gradually.

Withdrawals & refunds management — internal web app

thePower · In production for more than a year · PostgreSQL (Data Warehouse) · Role-based access (4 roles)

100%
of requests resolved within 3 days
(down from 2 weeks to 1 month)

−60%
refunds processed, by contacting students in time

- Automates request validation and data cross-checking for refunds. Final execution is left to a person, given the sensitive amounts involved.
- School-wide standard tool, used by the 15 people who handle these requests. Includes a KPI module for managers.

For both projects, end-to-end ownership: identifying the need and pitching it to management, requirements with the team, data, permissions and prompt design, testing, deployment, user training and adoption, and KPI tracking. Code generated with Claude Code from my design; PostgreSQL integration with the IT team.

CORE SKILLS

Applied AI Conversational AI assistants · Prompt engineering · Claude Code (CLI) · LLM APIs (Grok, OpenAI) · Google AI Studio	**Automation & processes** Identifying automation opportunities · End-to-end design of internal tools · Intercom workflows · PostgreSQL / Data Warehouse · Role-based access control · Reporting and KPIs (Looker Studio)
Adoption & change management User training and support · Coordination with management, IT and support teams · Pilot and phased rollout · Human validation for sensitive decisions · Handoff to a person	**Operations & support** Support team coordination · Student lifecycle management · Complex issue resolution · Support workflow optimization · Support metrics (NPS, response times)
Business B2B sales · Key accounts · Portfolio retention and loyalty · Salesforce (user, with some configuration)	

PROFESSIONAL EXPERIENCE

thePower | *Customer Success · Team coordination (6 people) and AI projects* **April 2020 – September 2026**

- Coordinated a 6-person Student Success and support team: student lifecycle, technical issues and mass communication.
- Since January 2025, designed and took to production the two internal AI tools described in **Featured projects**.
- Analysis of support metrics in Intercom (response times, NPS and quality) to propose product improvements and automation. Workflows to automatically route conversations by team and student program.
- Refund and sales reports in Looker Studio for a year, until the refunds reporting moved to the KPI module of the refunds tool.

Genera Asesores Tributarios

Sales Manager **January 2019 – May 2020**

- Managed key accounts and optimized customer service operations. Analysis of sales and operational KPIs to redesign workflows and speed up response times.

Ayming | *Senior Account Manager & Business Development* **2007 – 2018**

- Prospecting and management of large B2B accounts in value-added consulting: negotiation of complex proposals, coordination with internal technical teams and portfolio retention, consistently meeting annual revenue targets.

Alico AIG Life | *Insurance Agent; Team Leader from 2004* **2002 – 2007**

- From 2004, led a 5-person sales team: training, mentoring and target management by area.

EDUCATION & CERTIFICATIONS

- [In progress] AI Maker & Automation Master's – thePower Tech School. Expected completion: December 2026.
- Bachelor's Degree in Business Administration and Management – Universidad Católica Boliviana.
- Master's in Digital Marketing – thePower.
- thePower courses: Digital Transformation; Designing and implementing a conversational framework for support teams; Fundamentals for support managers.
- Integrated Bilingual Education – British Council School.
